

# Crushing Bugs

## Bug #1

1. Because we already know where the bug is. I searched for keywords directly on google.
2. Keywords: **puzzle dropzone javascript**
3. I researched information on the Internet:  
<https://dev.to/lensco825/making-a-simple-drag-and-drop-with-js-29l2>  
<https://codepen.io/ycw/pen/pKdoww>
4. Asked Chat GPT : How do I exit a function in JS?  
How to fix multiple puzzles to be placed in the same drop zone?

## Bug #2

1. I searched for keywords: **puzzle dropzone reset javascript**
2. I researched information on the Internet:  
<https://github.com/dropzone/dropzone/issues/733>  
<https://github.com/dropzone/dropzone/issues/1321>
3. Asked Chat GPT : How to fix reset puzzles?

## Conclusion

Firstly, I don't want to rely too much on Chat GPT, so I try to find different information on the Internet. But I tried many times and nothing worked. Finally, I found the solution by asking Chat GPT.
